

Jellyfin: The Complete Onboarding & Support Guide

.📺 Welcome to the Library!

Hi! You're invited to my **Jellyfin** server! This is a private media library I run myself. If you've just created your account, follow this guide to get connected and start watching.

📺 Why You'll Love It

- 📺 **It's totally free:** No subscriptions or hidden fees. It's just something I like to share with friends and family.
- 📺 **Watch anywhere:** You can stream on your phone, tablet, or TV, even when you're away from home.
- 📺 **Always growing:** I'm constantly adding new releases and whatever shows are trending.

📺 What's Included

- 📺 **Tons of content:** A huge collection of high-quality movies and TV shows ready to go.
 - 📺 **No ads:** Just pure entertainment without any commercial breaks or interruptions.
 - 📺 **Syncs up:** Pick up exactly where you left off on any of your devices.
 - 📺 **Request system:** If you can't find something you want to watch, you can just ask me to add it!
-

📺 Getting Connected

You can watch on pretty much anything! Using a web browser works fine, but I definitely recommend using a dedicated app for a much smoother experience.

📺 On your Computer

- **Web Browser:** [Open Jellyfin Web](#)
- **Desktop App:** [Download Jellyfin Desktop](#)

📺 On your Phone

I recommend **Moonfin** for the best experience on mobile.

Moonfin (Recommended)

- [Download for iOS](#)
- [Download for Android](#)

📺 Smart TVs & Consoles

Just search your app store for these:

- **Google/Android TV:** Wholphin (Recommended)
- **Apple TV:** [Neptune Media Player \(TestFlight Beta\)](#) or Infuse (Paid)
- **Roku / Fire TV / PlayStation / Xbox:** Jellyfin

⚡ Logging in fast (Quick Connect)

Tired of typing passwords with a TV remote? Use **Quick Connect** to sign in instantly:

1. On your TV/New Device, select "**Quick Connect**" on the login screen. It will show a 6-digit code.
2. Open Jellyfin on a device where you are already logged in (like your phone).
3. Go to **Settings > Quick Connect** and enter the code.

☐☐ Server Address

When asked for a URL or Server Address, enter exactly:

`https://jellyfin.wedoto.net`

☐☐ Other Ways to Watch

If the recommended apps above don't fit your needs, or if you are using a specialized device (like a Steam Deck, Kodi, or a custom media PC), check these resources:

- ☐☐ [Moonfin Client GitHub](#)
- ☐☐ [Awesome Jellyfin Clients List](#)

☐☐ Can't find it? Request it!

If there's a movie or show you're looking for that isn't in the library yet, you can actually add it yourself using **Jellyseerr**.

Option A: Use the Web Portal

This is usually the easiest way. Just sign in with your **Jellyfin login**. ☐☐ [Open Request System](#)

Option B: Requesting via Moonfin (Mobile)

Moonfin is already set up to talk to our request system by default.

1. Tap on the **search icon**.
2. Search for the movie or show you'd like to watch.
3. If we don't have it yet, the title will show up under the "**Seerr**" section.
4. Just tap on it and hit **Request!**

Option C: Web Browser

When you log in, the request system should be ready to go. If it asks you to sign in, just use your **Jellyfin account**.

1. Click or tap the **Requests** button on the navigation bar.
 2. Search for any movie or TV show you're looking for.
 3. Select the title and hit **Request**.
-

☐ A Few Quick Things

☐☐ Watching Together

If you want to watch a movie with friends remotely, **SyncPlay** is built right into Moonfin and web browsers. Just tap the **SyncPlay icon** (the little group of people) in the player to start a shared room!

☐☐ Just a heads up on sharing...

I've got plenty of bandwidth, but it's not exactly infinite!

- **Please keep your login to yourself.**
 - If you have a friend or family member who wants an account, just let me know—they're free! I'd much rather give them their own login than have a bunch of people I don't know clogging up the server.
-

⚠ If things act up

If you run into a broken link, a missing episode, or the quality just looks off:

- **Got a complaint?** If something isn't working right, just shoot me a message. I'll do my best to fix it as soon as I can.

Keep in mind this is just a fun side project for me, so thanks for being patient if it takes me a bit to get things sorted!

📁 Keeping the library fresh

To keep the server fast and make room for new stuff, I'll occasionally clear out older or already-watched movies. If something you were planning to watch disappears, just request it again and I'll grab it!

📁 Reach Out

If you're stuck, forgot your password, or just need to get a hold of me:
